in your Horses if you want to
sell them. **D. W. Meadows**

THE CLAYTON CITIZEN.

They are looking over the country with the intention of buying. We would be glad to learn of their permanent location.

GEORGE R. KIRKPATRICK

This original thinker and splendid actor is the second of the speakers to be brought to Clayton by the local artists. He will speak to a Clayton audience the evening of Sunday, February 6th.

He is best known as the author of "War, What For?" a book which has had a thrill through the nation, has been into many editions, 150,000 cop-

GEORGE R. KIRKPATRICK

proves with age, and this when made from well cured grain.

Wheat is not fit to be made into flour until it has gone through the sweat in the stack before threshing or after it is in the bin. Even then, for milling purposes, it improves with age and the product that is being turned out by the Clayton Milling company at this time should not be too severely criticised by reason of the above stated facts, as it is made from Union county wheat of this year's production.

Mrs. Gill and others of the club

are doing much to make the work of the club beneficial to all of its members and since they are testing out the product of a home enterprise, should have much encouragement in this meeting.

Wanted—Dressmaking and family sewing two blocks east of Clayton Garage. Call on Mrs. J. Rhoda.

For Sale—220 acres adjoining town of Clayton. Bargain. See or write A. James McDonald Clayton, New Mexico.

Do You Read Labels?

Domestic science teachers and food authorities are urging the housewife to carefully read the labels on all food articles.

The laws of most states compel food manufacturers to print the ingredients of their products on the label, and this enables consumers to distinguish healthful foods from those which may be deleterious.

High-grade baking powders are made of pure cream of tartar, derived from grapes. Dr. Price's Cream Baking Powder is a type of the highest grade. It is pure and healthful beyond any question.

The low-grade baking powders are made from alum, a mineral acid salt. Most physicians condemn their use in food.

Consumers can learn the character of the baking powder by referring to the label, which must state whether the contents include cream of tartar, alum or phosphate.

Look Around Your Home Place

Certain Improvements Are Necessary

If there are many—don't try to make them all at once. Decide on the one you need most, then—build well—build for future needs as well as the present. It costs less to build big at first than to build and make additions.

Our stock is particularly attractive as to grades, and you will find our prices very reasonable.

Now!—is the time the shrewd buyer is building!

We call especial attention to our large stock of

ager Phone 3.

Mr. Ed Morgan and wife and little daughter, Juanita, spent the day Thursday, with Mr. and Mrs. Harry Arnett.

J. C. and Harry Arnett were business visitors in Clayton during the week. They report the city as enjoying a substantial growth and already has no peer in this section of the state.

The young people of this community have been availing themselves of the pleasure afforded them in the way of skating, creditable to the prevalent cold weather for the past week.

The la grippe is still raging in Ute valley, some just taking it and others convalescing. Ye News boy has had a recent attack and Mr. Hilgers and Ira Pennington have our thanks for a nice box of fruit that tasted good during the "grippe" days.

Dr. Walker of Rosston, Okla., and his brother, of northern Mo., are guests of Mr. and Mrs. Geo. Roberts

creation, as you or I may look at it. It is his idea, however, and he told the Citizen reporter that he wanted every one to enjoy the Triangle Films which he is showing.

"If there are people in Clayton who really cannot afford to see these films," he stated, "I'm willing to pass them in free. This applies particularly to washwomen and their families but it also applies to any other families that are so destitute that to pay admission to The Dixie would actually deprive them of any necessity of life."

Home Economics Club

On Saturday, February 12th, the Home Economics Club will hold a bread baking contest, under the supervision and direction of the Club, all breads to be baked to be prepared from the products of the Clayton Milling company. Three kinds of bread will be baked, light bread from wheat flour, Graham bread and corn bread. Judges will be selected by the officials of the club, care being taken in this connection that competent judges are selected and all who shall exhibit, whether members of the club or not, shall have a fair and impartial score of their product.

Bread will be scored and credited according to the following schedule:

General appearance 20
This includes size of loaf, shape of loaf, crust, color, character and depth.

Flavor 35
This includes odor and taste.

Lightness 45
Crumb 30

This includes character, subdivided into coarse, tough, moist, elastic, color and grain.

The Clayton Milling company is one of our infant industries and should be encouraged. There is one thing that should not be overlooked in connection with their wheat product, and that is that their capacity at the present time will not permit of an imported product for milling purposes and that NEW wheat, as all wheat men will know, will not make good flour. Flour itself im-
